

SIMPLY the best since 1943

Product Data: #207  
Effective January 2022

## FLUID FILM® AEROSOL (AS) & NON-AEROSOL (NAS) BLACK® / BULK

Technical Data Sheets | Aerosol & Non-Aerosol BLACK® / Bulk

FLUID FILM BLACK® is a penetrant and lubricant also used for corrosion prevention. It is a non-toxic, long lasting, thixotropic liquid that has been used for over fifty years in the highly corrosive marine environment of ships and offshore drilling rigs. More recently they have been introduced and successfully utilized in the Automotive and snow handling industries as a vehicle undercoating. The wet barrier creeps and migrates into tight seams and into the metal chassis to provide corrosion protection from salts and brines. **The addition of FLUID FILM BLACK® allows customers to protect their vehicle while restoring a rich black colour to the chassis or cover existing rust.**

FLUID FILM BLACK® is formulated from specially processed wool-wax, highly refined petroleum oils and selected agents to provide corrosion control, penetration, metal wetting and water displacement. The long lasting product contains no solvents, will not dry out and will penetrate to the base of all metals, providing corrosion protection from both natural and industrial atmospheres. Heavily corroded and/or frozen parts such as nuts, bolts, shafts, etc. that would normally be damaged during maintenance, can be salvaged by applying FLUID FILM BLACK®

---

**NOTE: ENVIROMENTALLY FRIENDLY – NAS is solvent Free and essentially Non-Toxic**

---

### FLUID FILM BLACK® PENETRANT, LUBRICANT and CORROSION PREVENTATIVE (NAS)

## TYPICAL PROPERTIES

*Unless designated otherwise, the following data refers to FLUID FILM BLACK® NAS or FLUID FILM BLACK® AS after the propellant has evaporated away following spray application.*

<b>Appearance</b>	Black coloured Liquid
<b>Viscosity</b>	<b>Brookfield</b> HBF, 21°C or 70 ° F <b>#2 Spindle</b> at 2 RPM <b>10 - 20 reading</b> (16,800 - 32,000 cps)
<b>Flash Point, Bulk Liquid:</b> <i>ASTM-92 Cleveland Open Cup</i>	207°C minimum.
<b>Non-Volatile</b>	89% minimum (3 hours @ 104°C).
<b>VOC.</b> <i>CARB 310</i>	AS: Less than 25%, NAS: Less than 1%
<b>Specific Conductivity</b>	Less than 10 <sup>-9</sup> ohm/cm @ 1 mHz.
<b>Specific Gravity</b>	0.875 - 0.885 (less propellant).
<b>Effect on Rubber</b> <i>ASTM D-471 @ ± 158°F 70 hours</i>	None on neoprene and buna-n. May cause swelling on non-oil-resistant rubber goods.
<b>Effect on Paint</b>	None on most painted surfaces.
<b>Effect on Aluminium</b>	No pitting.
<b>Extreme Pressure</b> <i>ASTM D-2782 Timken Method</i>	Fail load - 15 pounds.
<b>Wear Prevention - Characteristics</b> <i>ASTM D-2266 Four Ball Method</i>	40 Kg., 1200 RPM for 1 hour @ 75°C. Results: Scar diameter of 0.49mm.
<b>Repaintability</b>	Contain no silicones. It is recommended that surfaces treated with <b>FLUID FILM BLACK® AS or NAS</b> be hot water or steam detergent washed (49°C), whichever is most effective.
<b>Corrosion Protection</b> <i>ASTM D-1735 Humidity Cabinet</i>	Passes 50 days.

<b>ASTM D-1748</b> <i>Humidity Cabinet</i>	Passes 30 days.
<b>MIL-C-16173</b> <i>Corrosion Requirement</i>	Grade 2 -Soft Films. Meets & exceeds salt spray requirements.
<b>Water Replacement</b>	Displaces water from all metal surfaces (MIL-C-23411, Paragraph 3.6).
<b>Toxicity</b>	Non-toxic, LD-50 greater than 3 grams per kilogram. Non-irritating skin response. Very slight irritation to the eyes. (Toxicity tests performed according to standard methods by an independent laboratory).
<b>Warning</b>	<b>AS BLACK:</b> Extremely flammable. Contents under pressure. Do not puncture, incinerate or store above 49°C. Keep from open flame. <b>NAS BLACK:</b> Combustible. Do not incinerate
<b>Spray Nozzle Cleaning</b>	Turn can upside down, point in a safe direction and spray until only propellant escapes. If spray button becomes clogged during use, pull it from the can and clean it with a fine wire or needle. Replace the button with a gentle twisting motion, keeping it pointed in a safe direction. Do not stick pins or other objects into nozzle tube.
<b>Coverage</b>	Fluid Film NAS can be applied by spraying or brushing to a thickness of 3 to 4 mils. Coverage rate is <b>4.4 m<sup>2</sup> / litre.</b>  However, from experience when applied by hand in difficult locations, typically the application is thicker, and coverage rate is often <b>2.2 m<sup>2</sup> / litre.</b> This is simply a function of being able to access locations in hulls and voids etcetera

**KEEP OUT OF REACH OF CHILDREN.**
